Dual Action

This unit uses Dual Action to make large-screen displays possible.

When you use the Dual Action, be sure to close it.

CAUTION

BE CAREFUL NOT TO GET YOUR FINGERS CAUGHT WHEN OPENING AND CLOSING THE DUAL ACTION.

1. For safety's sake, always close the DUAL ACTION before leaving this unit unused for a prolonged period or switching OFF the ignition key.

If you switch OFF the ignition key with the DUAL ACTION tilted, the DUAL ACTION does not close.

2. Before the DUAL ACTION closes, there may be a braking sound from the safety mechanism. This is normal.
3. If you move the DUAL ACTION by hand, this may create play. To correct this play, with the power on for the unit, press the [O] button to close the DUAL ACTION.
4. After a disc is ejected, the DUAL ACTION automatically returns to the tilted or closed state. If there is any obstruction when the DUAL ACTION tries to close, the safety mechanism is triggered and the DUAL ACTION returns to the open state. If this happens, remove the obstruction, then press the [O] button.
5. To avoid scratching the compact disc, keep the 12 or 8 cm CD level when inserting or removing them.

Handling Compact Discs

Use only compact discs bearing the  or  mark.

Do not play heart-shaped, octagonal, or other specially shaped compact discs.

Some CDs recorded in CD-R/CD-RW mode may not be usable.

Handling

- Compared to ordinary music CDs, CD-R and CD-RW discs are both easily affected by high temperature and humidity and some of CD-R and CD-RW discs may not be played. Therefore, do not leave them for a long time in the car.
- New discs may have some roughness around the edges. If such discs are used, the player may not work or the sound may skip. Use a ball-point pen or the like to remove any roughness from the edge of the disc.
- Never stick labels on the surface of the compact disc or mark the surface with a pencil or pen.
- Never play a compact disc with any cellophane tape or other glue on it or with peeling off marks. If you try to play such a compact disc, you may not be able to get it back out of the

CD player or it may damage the CD player.

- Do not use compact discs that have large scratches, are misshapen, cracked, etc. Use of such discs may cause misoperation or damage.
- To remove a compact disc from its storage case, press down on the center of the case and lift the disc out, holding it carefully by the edges.
- Do not use commercially available CD protection sheets or discs equipped with stabilizers, etc. These may damage the disc or cause breakdown of the internal mechanism.

Storage

- Do not expose compact discs to direct sunlight or any heat source.
- Do not expose compact discs to excess humidity or dust.
- Do not expose compact discs to direct heat from heaters.

Cleaning

- To remove fingermarks and dust, use a soft cloth and wipe in a straight line from the center of the compact disc to the circumference.
- Do not use any solvents, such as commercially available cleaners, anti-static spray, or thinner to clean compact discs.
- After using special compact disc cleaner, let the compact disc dry off well before playing it.

- Dispose of spent batteries properly.

Attaching the Remote Control Unit to the Steering Wheel

1. Attach the holder to the steering wheel.

The diagrams below show how to install the remote control unit on the steering wheel of a car with the steering wheel on the Left. Install the remote control unit on the Left in a car with the steering wheel on the right side.

2. Installing the steering wheel remote control unit

Note:

The location to be chosen for the remote control unit depends on the configuration of the steering wheel. Make sure that the installation of the remote control unit does not prevent normal driving and that the remote control signal reaches the remote control sensor.

6. DCP

The control panel can be detached to prevent theft. When detaching the control panel, store it in the DCP (DETACHABLE CONTROL PANEL) case to prevent scratches.

We recommend taking the DCP with you when leaving the car.

Using the control panel being lowered results in a damage to the panel.
 - Do not use the control panel being left open as a tray to put an object on.
 - Moving the control panel manually will cause a malfunction such as getting out of order of the sloping mechanism, breakdown of the gears, etc. Do not draw the control panel forcibly.
- When the control panel is moved manually, press the [O] button several times to see if the control panel returns to the normal position and functions properly.
- Do not remove the DCP while you are driving a car.

Dolby Pro Logic II

Dolby Pro Logic II is a matrix decoding technology in which the updated digital matrix technology is applied and Dolby Pro Logic is further improved. It realizes excellent 5.1 channel reproduction of Dolby surround source as well as stereo sound sources such as CDs, thereby causing a surround channel to be full-ranged (20 Hz to 20 kHz) and become stereo. Therefore, you can enjoy any stereo sources with dynamic sound of 5.1 channel. According to a source to be reproduced, Music Mode or Matrix Mode can be selected.

- * Produced on the basis of the license of Dolby Laboratory Inc.

Dolby, Pro Logic, and Double D's are trademarks of Dolby Laboratory Inc. Unpublished Documents. Copyright 1992 – 1997 Dolby Laboratory Inc. All rights reserved.

● Music Mode

This mode is suitable for stereo sources like CDs. By optimizing frequency characteristics of the surround channel, a broader and deeper sound is assured. In addition, since broadness of the sound field varies with recording conditions of music sources, there is Adjusting Mode which makes a finer tuning available. (cf. page 16)

● Matrix Mode

This mode is suitable for AM/FM radio.

Note:

- Due to the characteristics of Dolby Pro Logic II, the sound is heard at a lower volume from the speakers when you change the AC-P II STD, AC-P II PRO, or P.EQ mode to the Dolby Pro Logic II mode.

1. Be sure to turn the power off when wiring.
2. Be particularly careful where you route the wires. Keep them well away from the engine, exhaust pipe, etc. Heat may damage the wires.
3. If the fuse should blow, check that the wiring is correct. If it is, replace the fuse with a new one with the same amperage rating as the original one.
4. To replace the fuse, open the lock on the source unit side, remove the old fuse and insert the new one. (Figure 9) * There are various types of fuse cases. Do not let the battery side terminal touch other metal parts.
5. Connect the CeNET extension cable fully and securely until it locks. When the CeNET extension cable is pulled, hold the slide cap part and pull it towards you. * When the CeNET extension cable is extended or branches, use extension cable CCA-520 (8 feet [2.5m]) or CCA-521 (2 feet [0.6m]), or Y-adapter CCA-519 (each of them is sold separately). * Use the CeNET extension cable made by Clarion.

1. S'assurer de mettre l'appareil hors circuit avant de faire le câblage.
2. Faire particulièrement attention lors de l'acheminement des fils. Les éloigner du moteur, des tuyaux d'échappement, etc. La chaleur risque d'endommager ces fils.
3. Si le fusible saute, vérifier si le câblage est correct. Si le fusible est grillé, le remplacer par un fusible neuf de même ampérage que le fusible d'origine.
4. Pour remplacer le fusible, ouvrir le loquet sur le côté de l'appareil pilote, retirer l'ancien fusible et insérer le fusible neuf. (Figure 9) * Il existe plusieurs types de boîtiers à fusibles. Ne pas laisser la borne de batterie entrer en contact avec les autres pièces métalliques.
5. Connecter le câble d'extension CeNET complètement et solidement jusqu'à ce qu'il soit verrouillé. Pour tirer le câble d'extension CeNET, tenir la partie coulissante du capuchon et tirer vers vous. * Pour étendre ou dériver le câble d'extension CeNET, utiliser le câble d'extension CCA-520 (2,5 m [8 pieds]) ou CCA-521 (0,6 m [2 pieds]), ou le adaptateur Y CCA-519 (ces câbles sont vendus séparément) * Utiliser les câbles d'extension CeNET fabriqués par Clarion.

1. Antes de hacer las conexiones, asegúrese de desconectar la alimentación de la unidad.
2. Sea especialmente cuidadoso al dirigir y fijar los cables. manténgalos alejados del motor, tubo de escape, etc. El calor puede dañar los cables.
3. Si el fusible se quema, revise las conexiones. Si está quemado, reemplace el fusible por otro nuevo con el mismo valor de amperaje que el original.
4. Para reemplazar el fusible, abra la tapa de la unidad fuente, retire el fusible antiguo e instale otro nuevo. (Figura 9) * Existen distintos tipos de cajas de fusibles. no permita que el terminal del lado de la batería quede en contacto con otras partes metálicas.
5. Conecte el cable prolongador CeNET completa y seguramente hasta que chasquee. Para desconectar el cable, sujete la parte de la tapa deslizable y tire hacia usted. * Para prolongar o ramificar el cable prolongador CeNET, utilice un cable prolongador CCA-520 (2,5 m) o CCA-521 (0,6 m), o un adaptador en Y CCA-519 (vendidos aparte). * Utilice un cable prolongador CeNET fabricado por Clarion.

1. 接线时务必关闭电源。
2. 请特别注意布线位置。使导线远离发动机、排气管等。高温可能损坏导线。
3. 如果保险丝烧断，请检查接线是否正确。如果接线正确，则请用与原来保险丝额定安培数相同的新保险丝更换。
4. 更换保险丝时，打开音源装置侧的锁定，取出旧保险丝后装入新保险丝。(图9) * 因为有各种类型的保险丝盒，因此，切勿使电池侧的端子接触到其他金属部分。
5. 牢固地连接 CeNET 扩展电缆直至锁定。要拔出 CeNET 扩展电缆时，请捏住滑帽部位将其面向自己拉动。 * 当 CeNET 扩展电缆延长或分路时，请使用扩展电缆 CCA-520 (8 英尺 (2.5 米)) 或 CCA-521 (2 英尺 (0.6 米))，或 Y 型适配器 CCA-519 (全部另售)。 * 使用 Clarion 制造的 CeNET 扩展电缆。
