SAFETY INFORMATION

A **CAUTION**

This service manual is intended for qualified service technicians; it is not meant for the casual do-it-yourselfer. Qualified technicians have the necessary test equipment and tools, and have been trained to properly and safely repair complex products such as those covered by this manual.

Improperly performed repairs can adversely affect the safety and reliability of the product and may void the warranty. If you are not qualified to perform the repair of this product properly and safely, you should not risk trying to do so and refer the repair to a qualified service technician.

B **WARNING**

This product may contain a chemical known to the State of California to cause cancer, or birth defects or other reproductive harm.

Health & Safety Code Section 25249.6 - Proposition 65

Where in a manufacturer's service documentation, for example in circuit diagrams or lists of components, a symbol is used to indicate that a specific component shall be replaced only by the component specified in that documentation for safety reasons, the following symbol shall be used:

C ● Safety Precautions for those who Service this Unit.

When checking or adjusting the emitting power of the laser diode exercise caution in order to get safe, reliable results.

D Caution:

1. During repair or tests, minimum distance of 13 cm from the focus lens must be kept.
2. During repair or tests, do not view laser beam for 10 seconds or longer.

E **CAUTION:**

USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

F **CAUTION**

This product is a class 1 laser product classified under the Safety of laser products, IEC 60825-1:2007, and contains a class 1M laser module. To ensure continued safety, do not remove any covers or attempt to gain access to the inside of the product. Refer all servicing to qualified personnel.

CLASS 1 LASER PRODUCT

CAUTION—CLASS 1M INVISIBLE LASER RADIATION WHEN OPEN, DO NOT VIEW DIRECTLY WITH OPTICAL INSTRUMENTS.

G **WARNING!**

The AEL (accessible emission level) of the laser power output is less than CLASS 1 but the laser component is capable of emitting radiation exceeding the limit for CLASS 1.

A specially instructed person should do servicing operation of the apparatus.

Laser diode characteristics

Wave length : 785 nm to 814 nm

Maximum output : 1 190 µW(Emitting period : unlimited)

Additional Laser Caution

Transistors Q101 in PCB drive the laser diodes.

When Q101 is shorted between their terminals, the laser diodes will radiate beam.

If the top cover is removed with no disc loaded while such short-circuit is continued, the naked eyes may be exposed to the laser beam.

CAUTION

Danger of explosion if battery is incorrectly replaced.

Replaced only with the same or equivalent type recommended by the manufacturer.

Discard used batteries according to the manufacturer's instructions.

1. SERVICE PRECAUTIONS

1.1 SERVICE PRECAUTIONS

1. You should conform to the regulations governing the product (safety, radio and noise, and other regulations), and should keep the safety during servicing by following the safety instructions described in this manual.
2. Before disassembling the unit, be sure to turn off the power. Unplugging and plugging the connectors during power-on mode may damage the ICs inside the unit.
3. To protect the pickup unit from electrostatic discharge during servicing, take an appropriate treatment (shorting-solder) by referring to "the DISASSEMBLY".
4. After replacing the pickup unit, be sure to check the grating.
5. Be careful in handling ICs. Some ICs such as MOS type are so fragile that they can be damaged by electrostatic induction.
6. area and a heat sink becomes hot areas. Be careful not to burn yourself.

7. The RESET button is at the back of the Detach Grille.

Note that the audio settings cannot be deleted by a hard reset.

Reset the audio settings from the initial setting menu.

8. Be careful not to damage the Knob for the Slide Switches (S351, S601) at the bottom of the Tuner Amp Unit while handling it or attaching the Bottom Plate.
9. The part listed below is difficult to replace as a discrete component part.
When the part listed in the table is defective, replace whole Assy.

TUNER AMP UNIT	IC851	LT1912EMSE	Heat pad
----------------	-------	------------	----------

10. RGB LED's (D1831 - D1864) are used for the illumination of the Keyboard Unit. To avoid the color heterogeneity, replace the whole of the Keyboard Unit, even if only one of RGB LED's was defective.

1.2 NOTES ON SOLDERING

- For environmental protection, lead-free solder is used on the printed circuit boards mounted in this unit.
A Be sure to use lead-free solder and a soldering iron that can meet specifications for use with lead-free solders for repairs accompanied by reworking of soldering.
- Compared with conventional eutectic solders, lead-free solders have higher melting points, by approximately 40°C. Therefore, for lead-free soldering, the tip temperature of a soldering iron must be set to around 373°C in general, although the temperature depends on the heat capacity of the PC board on which reworking is required and the weight of the tip of the soldering iron.

Compared with eutectic solders, lead-free solders have higher bond strengths but slower wetting times and higher melting temperatures (hard to melt/easy to harden).

The following lead-free solders are available as service parts:

- Parts numbers of lead-free solder:

B GYP1006 1.0 in dia.

GYP1007 0.6 in dia.

GYP1008 0.3 in dia.

File system.....	FAT12, FAT16, FAT32
MP3 decoding format	MPEG-1 & 2 Audio Layer 3
WMA decoding format	Ver. 7, 7.1, 8, 9, 10, 11, 12 (2 ch audio) (Windows Media Player)
AAC decoding format.....	MPEG-4 AAC (iTunes encoded only) (.m4a) (Ver. 10.4 and earlier)
WAV signal format	Linear PCM & MS ADPCM (Non-compressed)

USB

USB standard specification	USB 2.0 full speed
Maximum current supply	1 A
USB Class.....	MSC (Mass Storage Class)
File system.....	FAT12, FAT16, FAT32
MP3 decoding format	MPEG-1 & 2 Audio Layer 3
WMA decoding format	Ver. 7, 7.1, 8, 9, 10, 11, 12 (2 ch audio) (Windows Media Player)
AAC decoding format.....	MPEG-4 AAC (iTunes encoded only) (.m4a) (Ver. 10.4 and earlier)
WAV signal format	Linear PCM & MS ADPCM (Non-compressed)

SD

Compatible physical format	Version 2.00
Maximum memory capacity	32 GB (for SD and SDHC)
File system.....	FAT12, FAT16, FAT32
MP3 decoding format	MPEG-1 & 2 Audio Layer 3
WMA decoding format	Ver. 7, 7.1, 8, 9, 10, 11, 12 (2 ch audio) (Windows Media Player)
AAC decoding format.....	MPEG-4 AAC (iTunes encoded only) (.m4a) (Ver. 10.4 and earlier)
WAV signal format	Linear PCM & MS ADPCM (Non-compressed)

D

FM tuner

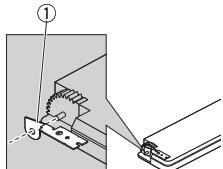

Frequency range.....	87.5 MHz to 108.0 MHz
Usable sensitivity.....	9 dBf (0.8 µV/75 Ω, mono, S/N: 30 dB)
Signal-to-noise ratio.....	72 dB (IEC-A network)

F

Fastening the front panel

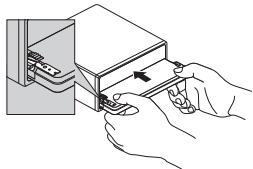

If you do not plan to detach the front panel, the front panel can be fastened with supplied screws and holders.

- 1 Attach the holders to both sides of the front panel.

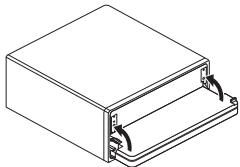

① Holder : CND1249, CND1250 (UC)
Holder : CXX1644, CXX1645 (EW5, ES)

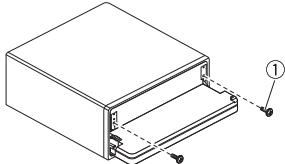

- 2 Replace the front panel to the unit.

- 3 Flip the holders into upright positions.

- 4 Fix the front panel to the unit using fixing screws.

① Screw : BPZ20P060FTC (UC)
Screw : XXX7020 (EW5, ES)

2.2 DISC/CONTENT FORMAT

3. BASIC ITEMS FOR SERVICE

3.1 CHECK POINTS AFTER SERVICING

A

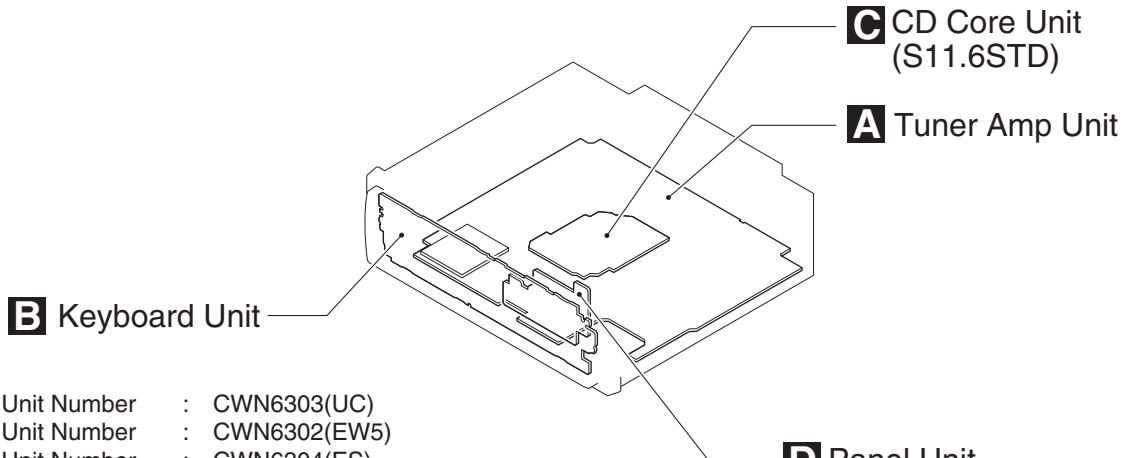

To keep the product quality after servicing, please confirm following check points.

No.	Procedures	Item to be confirmed
1	Confirm whether the customer complain has been solved. If the customer complain occurs with the specific media, use it for the operation check.	The customer complain must not be reappeared. Display, audio and operations must be normal.
2 CD	Play back a CD. (Track search)	No malfunction on display, audio and operation.
3 FM/AM tuner	Check FM/AM tuner action. (Seek, Preset) Switch band to check both FM and AM.	Display, audio and operations must be normal.
4	Check whether no disc is inside the product.	The media used for the operating check must be ejected.
5	Appearance check	No scratches or dirt on its appearance after receiving it for service.

See the table below for the items to be checked regarding audio:

Item to be checked regarding audio
Distortion
Noise
Volume too low
Volume too high
Volume fluctuating
Sound interrupted

5. DIAGNOSIS

5.1 OPERATIONAL FLOWCHART

A

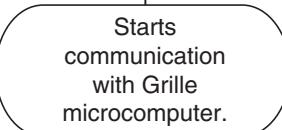

B

C

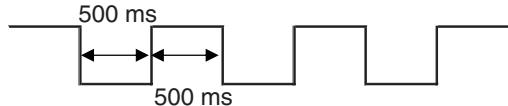

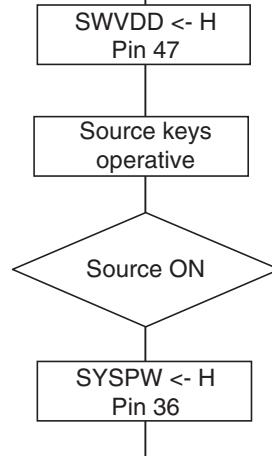

D

- $1.3 \text{ V} < \text{CSENS} < 2 \text{ V}$
- Last source returns.
- CD loading functions are available.
- Keys except for EJECT key are not available.

E

In case of the above signal, the communication with Grille microcomputer may fail.
If the time interval is not 500 msec, the oscillator may be defective.

F

Completes power-on operation.
(After that, proceed to each source operation)

5.2 ERROR CODE LIST

Error Code

The error status occurs when CD/USB/SD cannot operate, or stop during operation due to an error.

The reason for such error is displayed with a numeral.

This intends to reduce the number of nonsense calls from users and to assist in analysis/repair in services.

1. Basic display method

An error status (F0h) is entered in the Media status area of the source concerned, and the code in the minute/second area for notification.

E.g. For Read Error

Media status (disc) = 0xF0h

Minute (upper): FFh

Minute (lower): 07h

Second: 07h

- As for VD ERROR, the error status shall be 0xFB.

- Example of head unit display

The following occurs depending on the LCD display capability. The error No. comes in xx.

* For OEM, the error shall be displayed as per the specification of the OEM destination.

Display in 8 digits	Display in 6 digits	Display in 4 digits	
Code	Source	Error status	Details and reasons
ERROR-xx		ERR-xx	E-xx

2. List of error status codes

Code	Source	Error status	Details and reasons
07h	CD	Read_Error	The CD mecha cannot read the Disc TOC The TOC section of the PRD/Disc has been damaged
10h	CD	Carriage Home NG	The CRG of the CD mecha cannot move to the inner perimeter The CRG of the CD mecha cannot move from the inner perimeter => Failure in the HOME SWITCH of the CD mecha. Failure in CRG movement. Failure in communication between the microcomputer and servo LSI.
11h	CD	Focus_Error (Focus Error in mechanism set up)	The CD mecha cannot take focus. Dirt on the back of the disc and CD-RW. Significant vibration.
12h	CD	Spindle Rock, ID/SubCode Read Error/RF AMP NG	No spindle lock occurs in the CD mecha. No sub-code can be read. No appropriate RF AMP gain is set up. => Failure in the spindle. Scratches or dirt on the disc. Significant vibration. CD-R with no written content. Occasionally the back of the disc. CD signal abnormality.
15h	CD	RF NG	Failed to read RF -> CD-R with no written content. CD-RW with no written content.
17h	CD	Setup NG	The AGC protection does not work. Easily become out of focus. => Scratches or dirt on the disc. Significant vibration. CD-RW
23h	CD	File Format NG	Written in the incompatible file format. => The CD-ROM recorded in a file format other than ISO 9660 Level 1 or 2 has been set (e.g.UDF).
	USB	File Format NG	Written in the incompatible file format. => Recorded in a file format other than FAT 12/16/32
	SD	File Format NG	Written in the incompatible file format. => Recorded in a file format other than FAT 12/16/32
30h	CD	Search Time Out	The CD mecha could not reach the target address => Failure in the CRG or tracking. Scratches on the disc
50h	CD	Loading_Ejecting_Mecha_Error	Disc LoadNG/EjectNG Foreign object inserted in the mecha. Disc stuck.
16h	USB	Unsuccessful authentication of iPod	Unsuccessful authentication of iPod (this occurs only with iPod) => In case authentication is attempted again and an error is turned back from the iPod or authentication IC during iPod authentication
18h	USB	Incompatible device	Incompatible device connection detected => In case something other than mass storage or iPod is connected In case incompatible iPod is connected. Or in case the connected iPod is compatible but has an incompatible firmware version.
	SD	Incompatible device	Incompatible card connected detected (e.g. incompatible MMC) etc.
22h	CD	Not playable	No playable file The CD-ROM set has no MP3, WMA, AAC or WAV file.
	USB	Not playable	No playable file The USB device set has no MP3, WMA, AAC or WAV file.
	SD	Not playable	No playable file The SD card set has not MP3, WMA, AAC or WAV file.
24h	CD	All DRM	All playable files in the disc are DRM.
	USB	All DRM	All playable files in the device are DRM.
	SD	All DRM	All playable files in the SD card are DRM.
19h	USB	Communication error	Cannot communicate with the device => In case the device failure or other reason prevents communication
	SD	Communication error	Cannot communicate with the SD card => In case the SD card failure or other reason prevents communication

A External storage device (USB, SD)/iPod

Message	Cause	Action
NO DEVICE	No USB storage device or iPod is connected.	Connect a compatible USB storage device/iPod.
FORMAT READ	Sometimes there is a delay between the start of playback and when you start to hear any sound.	Wait until the message disappears and you hear sound.
NO AUDIO	There are no songs.	Transfer the audio files to the USB storage device and connect.
	The connected USB storage device has security enabled.	Follow the USB storage device instructions to disable the security.
SKIPPED	The connected USB storage device contains files embedded with Windows Media™ DRM 9/10.	Play an audio file not embedded with Windows Media DRM 9/10.
PROTECT	All the files in the USB storage device are embedded with Windows Media DRM 9/10.	Transfer audio files not embedded with Windows Media DRM 9/10 to the USB storage device and connect.
NOT COMPATIBLE	The USB device connected to is not supported by this unit.	<ul style="list-style-type: none"> • Connect a USB Mass Storage Class compliant device. • Disconnect your device and replace it with a compatible USB storage device.
D	Non-compatible iPod	Disconnect your device and replace it with a compatible iPod.
	Non-compatible SD storage device	Remove your device and replace it with a compatible SD storage device.

Message	Cause	Action
CHECK USB	The USB connector or USB cable has short-circuited.	Check that the USB connector or USB cable is not caught in something or damaged.
	The connected USB storage device consumes more than maximum allowable current.	Disconnect the USB storage device and do not use it. Turn the ignition switch to OFF, then to ACC or ON and then connect only compliant USB storage devices.
ERROR-19	The iPod operates correctly but does not charge.	<p>Make sure the connection cable for the iPod has not shorted out (e.g., not caught in metal objects). After checking, turn the ignition switch OFF and back ON, or disconnect the iPod and reconnect.</p> <ul style="list-style-type: none"> • Perform one of the following operations. <ul style="list-style-type: none"> –Turn the ignition switch OFF and back ON. –Disconnect or eject the external storage device. –Change to a different source. Then, return to the USB or SD source. • Disconnect the cable from the iPod. Once the iPod's main menu is displayed, reconnect the iPod and reset it.
	iPod failure.	Disconnect the cable from the iPod. Once the iPod's main menu is displayed, reconnect the iPod and reset it.

Message	Cause	Action
ERROR-23	USB storage device was not formatted with FAT12, FAT16 or FAT32.	USB storage device should be formatted with FAT12, FAT16 or FAT32.
ERROR-16	The iPod firmware version is old.	Update the iPod version.
	iPod failure.	Disconnect the cable from the iPod. Once the iPod's main menu is displayed, reconnect the iPod and reset it.
STOP	There are no songs in the current list.	Select a list that contains songs.
Not found	No related songs.	Transfer songs to the iPod.

Bluetooth device

Message	Cause	Action
ERROR-10	The power failed for the Bluetooth module of this unit.	Turn the ignition switch OFF and then to ACC or ON. If the error message is still displayed after performing the above action, please contact your dealer or an authorized Pioneer Service Station.

Pandora

Message	Cause	Action
ERROR-19	Communication failed.	Disconnect the cable from the iPod. Once the iPod's main menu is displayed, reconnect the iPod and reset it.
Start up the Pandora Application	The Pandora application has not started running yet.	Start up the Pandora application from your iPod/iPhone.

Message	Cause	Action
Try again later	Unable to save thumb rating. Unable to save BookMark. Pandora system is undergoing maintenance.	Try again later.
Skip limit reached	Skip limit reached.	Do not exceed the skip limit.
Check Application	This version of the Pandora application is not supported.	Connect an iPod/iPhone that has a compatible version of the Pandora application installed.
Check Device	Device error message displayed in iPod/iPhone. Pandora Application. Unable to play music from Pandora.	Please check your message displayed in iPod/iPhone.

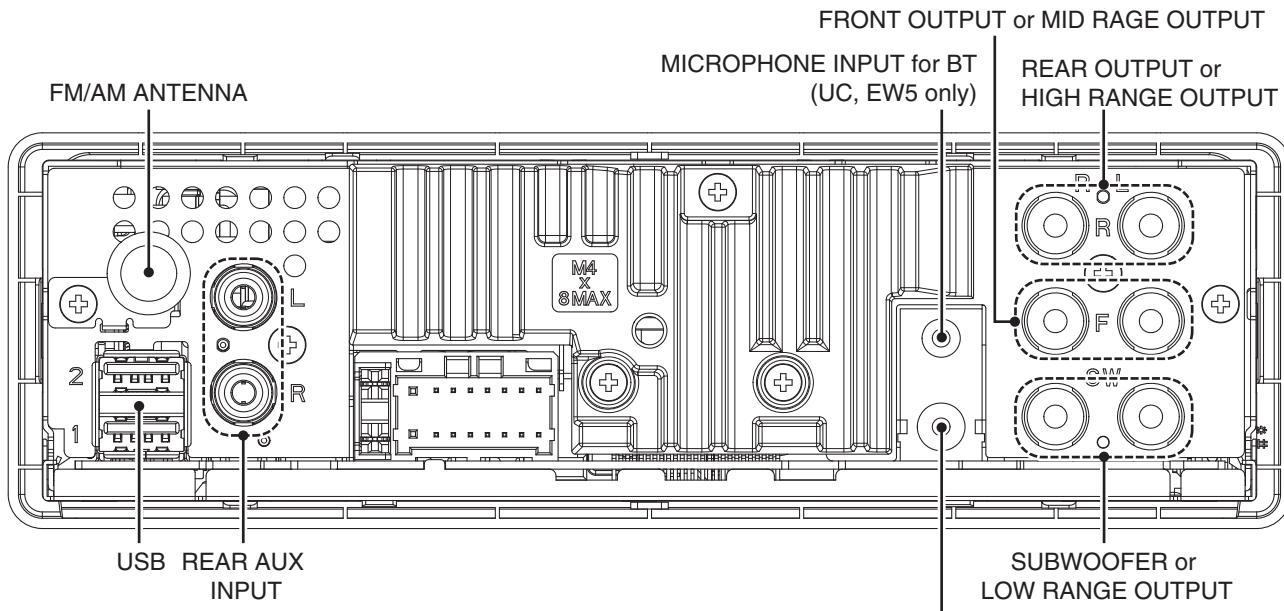

No Available Station	No station found.	Create a station in the Pandora application on your iPod/iPhone.
No Active Stations	No station selected.	Select a station.

Auto TA and EQ

Message	Cause	Action
ERR:MIC check	The microphone is not connected.	Plug the supplied microphone securely into the jack.
ERR:Front Speaker,ERR:Front-Lch,	The microphone cannot pick up the measuring tone of a speaker.	<ul style="list-style-type: none"> Confirm that the speakers are connected correctly. Cancel muting the front speaker units.
ERR:Front-Rch,ERR:Rear-Lch	Tone of a speaker.	<ul style="list-style-type: none"> Correct the input level setting of the power amp connected to the speakers. Set the microphone correctly.
ERR:Rear-Rch,ERR:SubW-Lch,ERR:SubW-Rch,ERR:SubWoofer		
ERR:Outside Noise	The surrounding noise level is too high.	<ul style="list-style-type: none"> Stop your car in a place that is quiet, and switch off the engine, air conditioner and heater. Set the microphone correctly.

##:OK or NG

- If nothing appears on the screen:

There might be a problem in communication or abnormality in the display microcomputer.

- If NG appears somewhere:

There might be defective connection between the display microcomputer and image ROM.

For instance, NG appearing with respect to the data bus does not necessarily mean data bus connection is definitely defective.

Where the address bus is the reason for NG appearing, an error could still occur when checking the data bus.

6.2 CD TEST MODE

● Flow Chart

A

To enter the test mode: [PHONE] + [BAND] -> BUP + ACC ON (UC, EW5)
 [COLOR] + [BAND] -> BUP + ACC ON (ES)

Operate with a Remote Control with 1 - 6 keys for a CD Receiver in the test mode.

B

*1) TRK TYP → + 6 dB → + 12 dB

TRK 06 MIN 06 SEC 06 → TRK 12 MIN 12 SEC 12

*2) Focus Close → S. Curve → F EQ measurement setting

TRK 00 MIN 00 SEC 00 → TRK 01 MIN 01 SEC 01 → TRK 02 MIN 02 SEC 02

(TRK 99 MIN 99 SEC 99)

*3) F.Offset Display → RF.Offset → T.Offset Display → Switch to the order of the original display

*4) 100TR Jump

E *5) TRK/MIN/SEC → F.AGC → T.AGC Gain → F.Bias → RF AGC

↑

*6) CRG motor voltage = 2 [V]

[Key]	Operation Test Mode
[BAND]	Power On/Off
[UP]	CRG + / TR Jump + (Direction of the external surface)
[DOWN]	CRG - / TR Jump - (Direction of the internal surface)
[1]	T. CLS & AGC & Applicable servomechanism / AGC,AGC display setting
[2]	RF Gain switching / Offset adjustment display / T.Balance adjustment / T. Open
[3]	F. Close,S. Curve / Rough Servo and RF AGC / F,T,RF AGC
[6]	F. Mode switching / Tracking Close

- After the [EJECT] key is pressed keys other than the [EJECT] key should not be pressed, until disc ejection is complete.
- When the key [UP] or [DOWN] is pressed during the Focus Search, the power supply should be immediately turned off (otherwise the lens sticks to Wall, causing the actuator to be damaged).
- In the case of 100TR Jump, the mechanism shall be set to the Tracking Close mode when the key is released.
- When the power is turned on/off the gain of the RFAMP is reset to 0 dB. At the same time all the self-adjusting values shall return to the default setting.
- Do not do Tracking Servo Close before doing Focus Servo Close. (Because the overcurrent flows)

7. DISASSEMBLY

While the photograph shown is slightly different from this model in shape, the disassembly procedure is the same.

● Removing the Panel Assy (Fig.1)

- 1 Remove the two screws.
- 2 Release the two latches and then remove the Panel Assy.

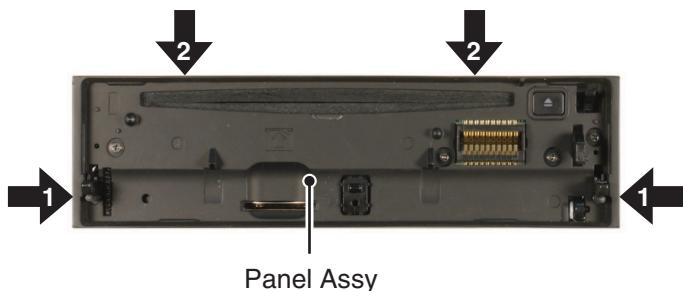

Fig.1

● Removing the CD Mechanism Module (Fig.2, 3, 4)

- 1 Remove the screw.
- 2 Remove the two screws.

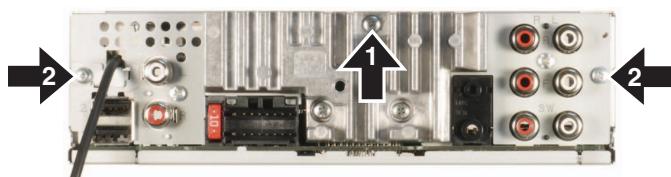

Fig.2

The CD Mechanism Module side is made a bottom.

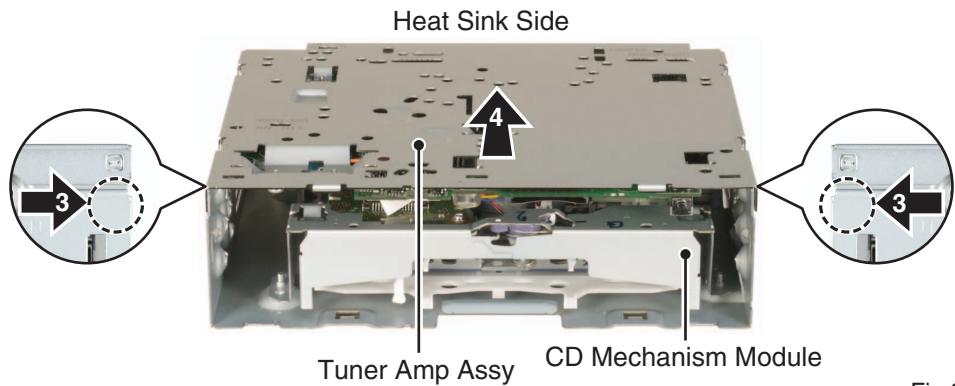

Fig.3

- 3 Push the area and remove the two hooks.
- 4 Slide the Tuner Amp Assy in the direction of the arrow.

Lift off the Tuner Amp Assy from the Front Side.

- 5 Disconnect the FFC and then remove the CD Mechanism Module.

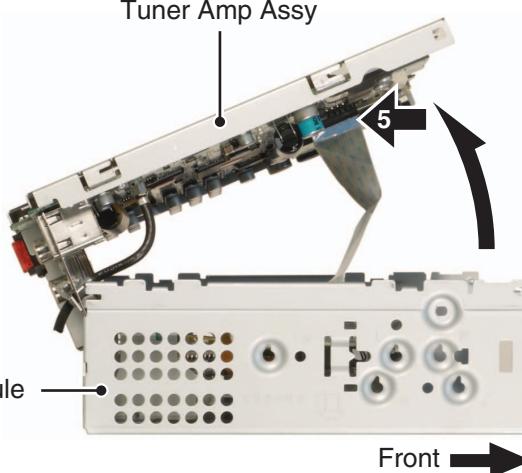

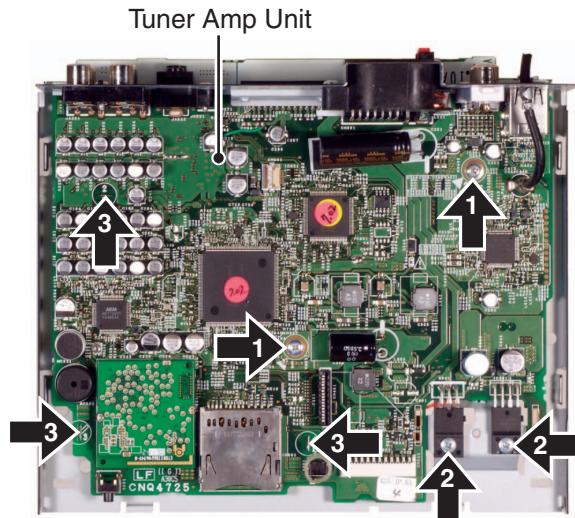

Fig.4

A ● Removing the Tuner Amp Unit (Fig.5)

- 1 Remove the two screws.
- 2 Remove the two screws.
- 3 Straighten the tabs at three locations indicated and then remove the Tuner Amp Unit.

B

C

Fig.5

D ● Attention of removing (Fig.6)

Don't remove this screws excluding the dismantlement of the CD Mechanism Module.

D

E

F

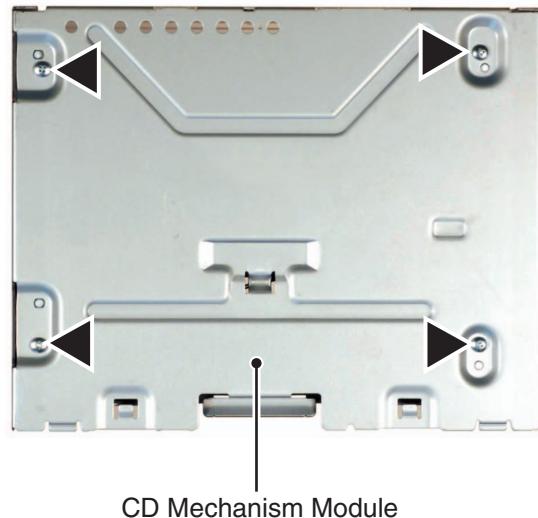

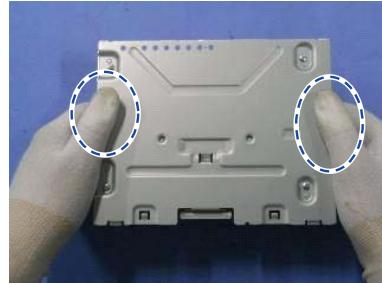

Fig.6

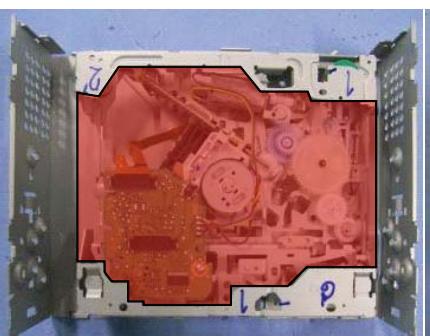

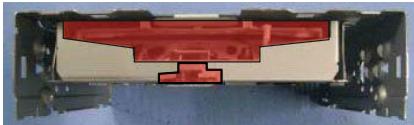

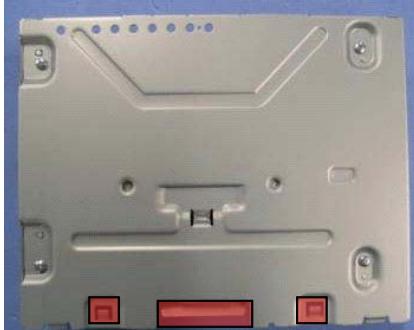

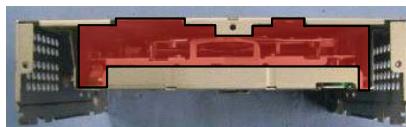

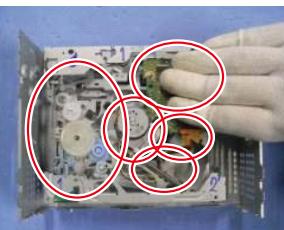

● How to carry the mecha unit

1. Hold the designated points (shown with dashed lines) of the upper chassis and the front/rear bracket.
2. Be careful not to hold the solid line portions or the CRG mecha part or insert foreign substances, to prevent distortion.
3. When holding the sides of the upper chassis, do not apply excessive force to prevent distortion. (Approx. 8N or less)

F

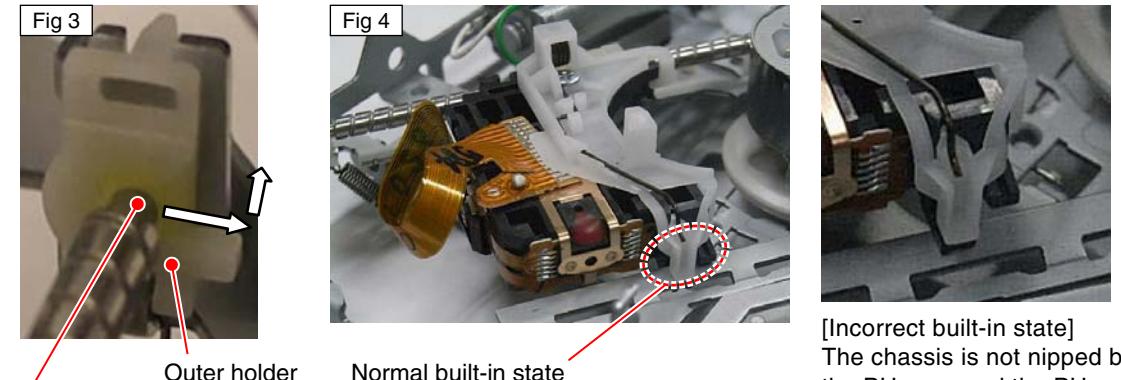

● How to remove the PU unit

- A
1. Create an empty-clamp state according to "How to create empty clamp state (motor drive)".
 2. Hook the feeding screw biasing spring to a tentative hooking portion (Fig 2b). Be careful not to get injured by the spring edge.
 3. Hold the PU at the position A as shown in Fig 1. Slide the PU as far as possible toward the holder in the feeding screw so that a joint on the outer end of the feeding screw is loosened.
 4. As shown in Fig 3, move the rear end of the feeding screw laterally and then upward, to remove it from the outer holder.
 5. Lift the PU unit to disengage it from Part B of the chassis (Fig 4), and remove the PU unit.
- (Cautions) When re-installing the PU, be sure to first nip the chassis and the PU unit (Fig 4) at the position B.
Also, make sure to fully hook the feeding screw biasing spring (Fig 2a).
Please follow the service manual for adjustment of the PU unit after the re-installation.

B

C

E

8. EACH SETTING AND ADJUSTMENT

8.1 CD ADJUSTMENT

1) Cautions on adjustments

- In this product the single voltage (3.3 V) is used for the regulator. The reference voltage is the REFO1 (1.65 V) instead of the GND.

If you should mistakenly short the REFO1 with the GND during adjustment, accurate voltage will not be obtained, and the servo's misoperation will apply excessive shock to the pickup. To avoid such problems:

- a. Do not mix up the REFO1 with the GND when connecting the (-) probe of measuring instruments. Especially on an oscilloscope, avoid connecting the (-) probe for CH1 to the GND.
- b. In many cases, measuring instruments have the same potential as that for the (-) probe. Be sure to set the measuring instruments to the floating state.
- c. If you have mistakenly connected the REFO1 to the GND, turn off the regulator or the power immediately.
- Before mounting and removing filters or leads for adjustment, be sure to turn off the regulator.
- For stable circuit operation, keep the mechanism operating for about one minute or more after the regulator is turned on.
- In the test mode, any software protections will not work. Avoid applying any mechanical or electrical shock to the mechanism during adjustment.
- The RFAGC and RFO signals with a wide frequency range are easy to oscillate. When observing the signals, insert a resistor of 1k ohms in series.
- The load and eject operation is not guaranteed with the mechanism upside down. If the mechanism is blocked due to mistaken eject operation, reset the product or turn off and on the ACC to restore it.

2) Test mode

This mode is used to adjust the CD mechanism module.

- To enter the test mode.
[PHONE] + [BAND] -> BUP + ACC ON (UC, EW5)
[COLOR] + [BAND] -> BUP + ACC ON (ES)

- To exit from the test mode.

Turn off the ACC and back up.

Notes:

- a. During ejection, do not press any other keys than the EJECT key until the loaded disc is ejected.
- b. If you have pressed the (UP) key or (DOWN) key during focus search, turn off the power immediately to protect the actuator from damage caused by the lens stuck.
- c. For the TR jump modes except 100TR, the track jump operation will continue even if the key is released.
- d. For the CRG move and 100TR jump modes, the tracking loop will be closed at the same time when the key is released.
- e. When the power is turned off and on, the jump mode is reset to the single TR (91), the RF amp gain is set to 0 dB, and the auto-adjustment values are reset to the default settings.

8.2 CHECKING THE GRATING AFTER CHANGING THE PICKUP UNIT

A

- Note :**

The grating angle of the PU unit cannot be adjusted after the PU unit is changed. The PU unit in the CD mechanism module is adjusted on the production line to match the CD mechanism module and is thus the best adjusted PU unit for the CD mechanism module. Changing the PU unit is thus best considered as a last resort. However, if the PU unit must be changed, the grating should be checked using the procedure below.

- Purpose :**

To check that the grating is within an acceptable range when the PU unit is changed.

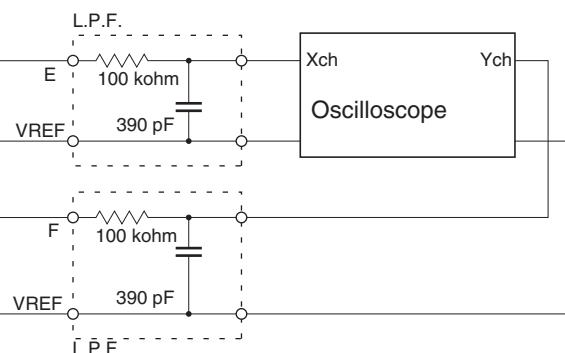

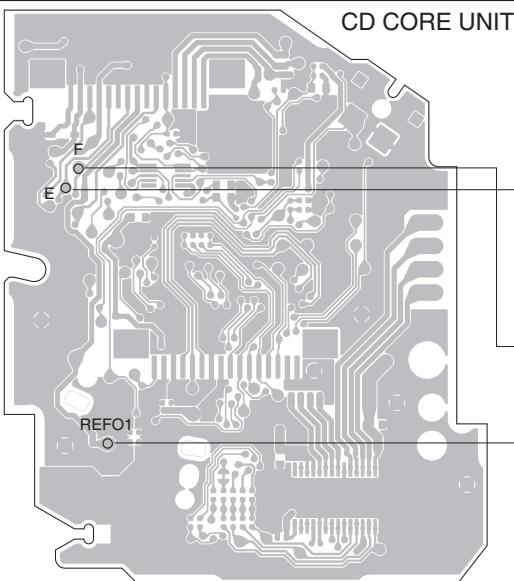

B

- Symptoms of Mal-adjustment :**

If the grating is off by a large amount symptoms such as being unable to close tracking, being unable to perform track search operations, or taking a long time for track searching.

- Method :**

- | | |
|-----------------------|----------------------------|
| • Measuring Equipment | • Oscilloscope, Two L.P.F. |
| • Measuring Points | • E, F, REFO1 |
| • Disc | • TCD-782 |
| • Mode | • TEST MODE |

- Checking Procedure**

1. In test mode, load the disc and switch the 3 V regulator on.
2. Using the UP and DOWN buttons, move the PU unit to the innermost track.
3. Press key 3 to close focus, the display should read "91". Press key 2 to implement the tracking balance adjustment the display should now read "81". Press key 3. The display will change, returning to "81" on the fourth press.
4. As shown in the diagram above, monitor the LPF outputs using the oscilloscope and check that the phase difference is within 75°. Refer to the photographs supplied to determine the phase angle.
5. If the phase difference is determined to be greater than 75° try changing the PU unit to see if there is any improvement. If, after trying this a number of times, the grating angle does not become less than 75° then the mechanism should be judged to be at fault.

- Note**

Because of eccentricity in the disc and a slight misalignment of the clamping center the grating waveform may be seen to "wobble" (the phase difference changes as the disc rotates). The angle specified above indicates the average angle.

- Hint**

Reloading the disc changes the clamp position and may decrease the "wobble".

8.3 PCL OUTPUT CONFIRMATION

A

● PCL Output

In the normal operation mode (with the detachable panel installed, the ACC switched ON, the standby mode cancelled), shift the TEST_IN IC601 (Pin 61) terminal(TP : TESTIN1) to H.

The clock signal is output from the PCL terminal IC601 (Pin 37)(TP : PCL).

The frequency of the clock signal is 625.0 kHz that is one 32th of the fundamental frequency (20 MHz).

If the clock signal out of the range, the X'tal (X601) should be replaced with new one.

9. EXPLODED VIEWS AND PARTS LIST

- A**
- NOTES : • Parts marked by " * " are generally unavailable because they are not in our Master Spare Parts List.
 • The mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
 • Screw adjacent to mark on the product are used for disassembly.
 • For the applying amount of lubricants or glue, follow the instructions in this manual.
 (In the case of no amount instructions, apply as you think it appropriate.)

11.1 TUNER AMP UNIT

A NOTE FOR PCB DIAGRAMS

1. The parts mounted on this PCB include all necessary parts for several destination.
- For further information for respective destinations, be sure to check with the schematic diagram.

12. ELECTRICAL PARTS LIST

NOTE:

- Parts whose parts numbers are omitted are subject to being not supplied.
- The part numbers shown below indicate chip components.

Chip Resistor

RS1/○S○○○J, RS1/○○S○○○J

Chip Capacitor (except for CQS.....)

CKS....., CCS....., CSZS.....

- The  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.

- Meaning of the figures and others in the parentheses in the parts list.

Example) IC 301 is on the point (face A, 91 of x-axis, and 111 of y-axis) of the corresponding PC board.

IC 301 (A, 91, 111) IC NJM2068V

- The expression of the unit in this manual is shown by u instead of μ . Please do not make a mistake.

<u>Circuit Symbol and No.</u>	<u>Part No.</u>	<u>Circuit Symbol and No.</u>	<u>Part No.</u>
Unit Number: CWN6303(UC)		IC 332 (B,25,49) IC	NJM4558V
Unit Number: CWN6302(EW5)		IC 351 (A,145,124) IC	NJM2794RB2
Unit Number: CWN6304(ES)		IC 401 (A,154,88) IC	TDA7706
Unit Name : Tuner Amp Unit		IC 481 (A,38,69) IC	TC7SZ04FU
Unit Number: (UC,ES)		IC 591 (B,157,70) IC	S-1155B50-U5
Unit Number: (EW5)		IC 601 (A,96,100) IC(UC)	PEG866A8
Unit Name : Keyboard Unit		(A,96,100) IC(EW5)	PEG865A8
Unit Number: CWX4023		(A,96,100) IC(ES)	PEG864A8
Unit Name : CD Core Unit (S11.6STD)		IC 651 (A,84,114) IC	S-80827CNMC-B8M
Unit Number: CWN6306		IC 661 (A,114,104) EEPROM	BR25L320F-W
